EXECUTIVE SUMMARY

Strategic and result-driven **Senior Executive** with over 20 years of leadership experience in technology commercialization, joint venture alliances, and corporate development across the global energy sector. Proven success directing partnership portfolios exceeding **USD 200 million** and securing **USD 100 million** in strategic technology collaborations with cross-industry leaders like Microsoft, AWS, Shell, TotalEnergies, and Technip Energies. Deep domain expertise in CCUS, carbon management, advanced gas separation, and energy transition initiatives, with a track record of accelerating laboratory innovations into commercially viable, market-ready assets.

CORE COMPETENCIES & KEYWORDS

- **Strategy & Growth:** Technology Commercialization, Technology Transfer, Joint Ventures, Commercial Strategy, Corporate Development, Market-Entry Strategy.
- **Partnership & Negotiations:** Alliance Management, Strategic Partnerships, Commercial Negotiation, Stakeholder Management, Cross-Functional Leadership.
- **Financial & Portfolio Analysis:** Investment Evaluation, Portfolio Management, Due Diligence, Techno-Commercial Assessment, Asset Management.
- **Technical Domains:** Energy Transition, CCUS, Decarbonization, Gas Processing, Open Innovation, Digital Transformation.

PROFESSIONAL EXPERIENCE

PRINCIPAL CONSULTANT

SAHYIA GLOBAL | 2025 – Present

- **Orchestrated market-entry and commercialization strategies** for global energy clients, focusing on scaling CCUS technologies and de-risking energy transition asset portfolios.
- **Delivered comprehensive techno-commercial evaluations** and due diligence framework tools to assess multi-million dollar greenfield investment opportunities.
- **Structured joint venture architectures** and commercialization pathways, successfully aligning client technologies with regional regulatory frameworks and market demands.

SENIOR MANAGER, STRATEGIC PARTNERSHIP MANAGEMENT

PETRONAS | 2023 – 2025

- **Governed a high-value partnership portfolio exceeding USD 200 million**, managing 300+ strategic agreements and 190 global partners to drive open innovation.
- **Spearheaded executive-level alliances** with tech giants and energy majors (Microsoft, AWS, Shell, TotalEnergies, Technip Energies), securing shared IP and collaborative digital transformation roadmaps.
- **Engineered comprehensive governance frameworks** and KPIs that improved partnership performance visibility and optimized corporate decision-making workflows.
- **Served as a strategic advisor to executive leadership**, delivering portfolio risk evaluations that protected long-term technology investments.

HEAD, PARTNERSHIP ALLIANCE & CONTRACT MANAGEMENT

PETRONAS | 2022 – 2023

- **Structured and closed 40+ complex technology commercialization** and alliance agreements, securing approximately **USD 100 million** in strategic venture capital and partner commitments.
- **Designed and deployed regional technology liaison capabilities**, reducing operational friction and accelerating technology deployment times across international assets.
- **Evaluated commercial, contractual, and technical risk parameters** on emerging opportunities to shield the organization from legal and financial liabilities.

HEAD, TECHNOLOGY COMMERCIALIZATION

PETRONAS | 2020 – 2022

- **Formulated the overarching commercialization roadmap** for emerging tech portfolios, accelerating the transition of laboratory assets into market deployment.
- **Built robust business cases and economic models** for CCUS and specialty oilfield chemicals, securing funding from executive investment boards.
- **Led multidisciplinary techno-commercial assessments**, screening intellectual property portfolios to determine high-yield commercialization pathways.

HEAD, SURFACE R&D (FLUIDS TECHNOLOGY & CCUS)

PETRONAS RESEARCH SDN BHD | 2017 – 2020

- **Directed 6 high-priority technology development programmes** focused on deep decarbonization and gas processing innovations.
- **Led, mentored, and upskilled a high-performing team** of 24 engineers and researchers, cultivating a pipeline of senior technical talent.
- **Optimized capital expenditure (CAPEX)**, infrastructure planning, and laboratory asset management across major regional R&D hubs.

- **Advanced multiple proprietary technologies** through Technology Readiness Levels (TRL), achieving field-deployment readiness for key assets.

PROGRAM LEADER, SUPERSONIC GAS SEPARATION

PETRONAS RESEARCH SDN BHD | 2011 – 2017

- **Served as a foundational member** of the high-profile PETRONAS High CO₂ Development Programme, shaping corporate strategy on carbon management.
- **Conceptualized, built, and commissioned** the world's largest CO₂ Cryogenic Testing Laboratory, establishing global benchmark standards for carbon capture R&D.
- **Managed a complex international collaboration** with Twister BV (Netherlands), co-developing next-generation supersonic gas separation systems.

FUEL EXECUTIVE

PETRONAS RESEARCH SDN BHD | 2005 – 2011

- **Formulated and engineered high-performance fuels** for elite motorsport applications, including Formula 1 and the World Superbike Championship.
- **Managed rigorous testing, validation, and benchmarking trials**, ensuring complete alignment with hyper-stringent international fuel specifications.

EDUCATION

- **Master of Science (MSc) in Chemical Engineering** | Universiti Teknologi PETRONAS
- **Bachelor of Engineering (BEng Honours) in Engineering** | The University of Melbourne

TECHNICAL TOOLS & LANGUAGES

- **Digital & Analytics:** Microsoft Copilot, Power BI, Data Analytics
- **Engineering Systems:** Aspen HYSYS, UniSim, Computational Fluid Dynamics (CFD)
- **Languages:** English (Fluent), Malay (Fluent), Arabic (Basic), Dutch (Basic)
